

Carla Hardy WV Project CommuniTree Planting in the City of Keyser

The City of Keyser hosted their first CommuniTree planting!

The inaugural CommuniTree planting with the City of Keyser maintenance department took place on Wednesday, October 24.

Members of the maintenance department picked up the trees from Moorefield, dug the holes, and planted the trees.

Planting sites included the City of Keyser pool & park, as well as a FEMA lot that the city owns and maintains.

Their new trees will soak up stormwater and help reduce flooding at these sites.

A word from the Project Leader, Jim Hannas:

“The planting event was enjoyable for all employees including myself. We look forward to the progress of our work and tree planting in the future.”
